#### DETAILED ACTION

Claims 1-3, 4-6 and 8 are pending in the instant application. Claim 4 remains withdrawn
as being drawn to non-elected subject matter.

## Response to Amendment/Arguments

- Applicant's response and claim amendments have been fully considered. The grounds of objection/rejection set forth in the office action dated November 1, 2007 are <u>maintained</u> and hereby made FINAL. Responses to arguments are provided below.
- 3. The generic claims remain rejected and prosecution is currently limited to the elected species of \*(RX+)-3-[44-isochus)-Updany-libusus-2-one. Compounds of Formula I that are not the elected species remain withdrawn from further consideration. Applicant is entitled to rejoinder of non-elected species upon allowability of the generic claims.

## Claim Objections

4. Claims 1-3, 5, 6 and 8 remain objected to for containing non-elected subject matter. Due to non-allowability of the generic claims, the elected subject matter is currently limited to the elected species. Other claimed compounds within Group I (process of using products of Formula 1 wherein Arr-phornyl and R<sup>2</sup>/R<sup>2</sup>-H. unsubstituted afteyl. or afteyl substituted with periodines; restriction requirement dated July 31, 2007) remain withdrawn as being non-elected subject matter.

Application/Control Number: 10/537,824 Page 3

Art Unit: 1626

### Claim Rejections - 35 USC § 112

- Below are responses to Applicant's remarks:
  - a) whild appear that the Examiner's analysis bugges on the fact that not all of the composite have been reduced to practice. But reduction to practice is not required."

Applicant's response is noted, however, it is not found to be persuasive. The analysis does not hinge on the fact that all compounds have not been reduced to practice. Rather, the disclosure of species within the claimed genus appears to be limited to the compounds reduced to practice. If this is incorrect, and the specification does have disclosure of species in addition to those reduced to practice. Applicant is encouraged to provide such showing.

b) "The fact that experimentation is required as not problemstic and the In re Wands court has stated that even a considerable amount of experimentation is permissible if the experimentation is routine. Here, Applicants are using standard and well known sevening techniques reported in the scientific literature. Thus, such experimentation as is required as not additional comprounds within the scape of the claims for earlier's is availing, and not "qualito."

MPEP 2164.03

The scope of the required enablement varies

Art Unit: 1626

inversely with the degree of predictability involved. but even in unpredictable arts, a disclosure of every operable species is not remared. A single embodiment may provide broad enablement in cases involving predictable factors, such as mechanical or electrical elements. In re Vickers, 141 F.2d 522, 526-27, 61 USPO 122, 127 (CCPA 1944); In re Cook, 439 F.2d 730, 734, 169 USPQ 298, 301 (CCPA 1971). However, in applications directed to inventions in arts where the results are unpredictable, the disclosure of a single species usually does not provide an adequate basis to support generic claims. In re Soll, 97 F.2d 623, 624. 38 USPQ 189, 191 (CCPA 1938). In cases involving unpredictable factors, such as most chemical reactions and physiological activity, more may be required. In re Fisher, 427 F.2d 833, 839, 166 USPO 18, 24 (CCPA 1970) (contrasting mechanical and electrical elements with chemical reactions and physiological activity). See also In re Wright, 999 F.2d 1557, 1562, 27 USPO2d 1510, 1513 (Fed. Cir. 1993); In re Vaeck, 947 F.2d 488, 496, 20 USPO2d 1438, 1445 (Fed. Cir. 1991). This is because it is not obvious from the disclosure of one species, what other species will work.

It is maintained that the predictability in the instant field of endeavor is low; evidence indicates that one of ordinary skill could not predict the operability of the invention of any species other than those disclosed. The species disclosed do not adequately represent the claimed genus.

c) "The Specification

Application/Control Number: 10/537,824

Art Unit: 1626

states that poorinus, rheumatoifs arthiritis, uterative choitis, autic respiratory disteres syndrome (ARDS), idiopathic fibrosis, glemeratonephrits and bollwas peruphigo are correlated with 1.4 millibition (see the references cited on page 9, line 29 to page 10, line 81. Fin example, inhibition of II.-8 is suggested as a restinction for themstool arbitrists by Selic et al. (see page A68) and has also brown recognized by the EPO (see Deorpoin Patent EPO894501). Page 1808 in Nicioloff et al. States "in the present study, but II.-8 gene expression by alveolar macrophages from the IPP and EPT-CTU patients studied appears to be specifically related to disease and not to some other exogeness sturiators." In addition, inhibition of II.-8 as a unside for treatment of ulcerative choitists has been recognized by the USPTO (see US 2,707,622); hibbition of II.-8 is aborecognized as a model for prevention of ARDs (see Mulacials et al. (1998) inflammation Research 47:151-157; inhibition of II.-8 is farther recognized by the USPTO; inhibition of II.-8 is aborecognized as a model for prevention of ARDs (see Mulacials et al. (1998) inflammation Research 47:151-157; inhibition of II.-8 is farther recognized as a model for useful and III.-8 inhibition is recognized as a treatment for administration of bullons pemphiguid by dispone (see Schmidel et al. (2601) Clin Explanmation Devemper II.-8 and the colamination between II.-8 and the colamination between III.-8 and the calibrated disease treatments.

Applicant's arguments are noted, however, they are not persuasive for the following reasons. The instant claims are drawn to nascent technology, ie. the method of treating diseases using compounds of Formula I. MPEP 2164.03 provides

("Nascent technology, however, must be enabled with a 'specific and useful teaching.' The law requires an enabling disclosure for nascent technology because a person of ordinary skill in the art has little or no knowledge independent from the patentee's instruction. Thus, the public's end of the bargain struck by the patent system is a full enabling disclosure of the claimed technology."

Moreover, the art of using IL-8 inhibition for treating the claimed diseases appears to be unpredictable (Section 8b, office action dated November 1, 2007). Therefore, it is maintained that the analysis of the Wands factors provided in the previous office action is still proper.

The 35 USC 112 1<sup>st</sup> paragraph rejection is <u>maintained</u> and hereby made FINAL. Claims 1-3, 5, 6 and 8 remain rejected.

#### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/537,824

Art Unit: 1626

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

 Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's cancellation of " " " " makes it unclear whether

(m) represents an alternative for "Aryl" or for a "substituent to Aryl." Appropriate correction is requested.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this
Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a).
Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
